THE SIGN OF SECURITY

CCTV MONITORING

WHY MONITORING?

- PREVENTATIVE**
- Intruders detected before any damage can be done
 - Intrusions are visually verified.
 - Audio warning capacity deters majority of offenders from further activity
 - Police can be guided direct to the intruders location

- COST EFFECTIVE**
- More cost effective than manned guarding
 - Immune to intimidation / corruption
 - Wont get tired or not show up for a shift
 - A security guard can only be in one place at a time
 - Increased productivity when staff are aware of monitoring

- OTHER BENEFITS**
- Intruders are watched live
 - All activations are securely recorded in our Control Station
 - Tampering with the CCTV system is detected at the Control Station
 - Monitor staff entering & leaving premises
 - Can help in suspect / fraudulent insurance claims on the premises

HOW IT WORKS?

- Cameras and sensors protect your property 24hrs a day
- When a sensor is breached or a camera picks up activity, live footage is transmitted to the Control Station
- One of our operators immediately issues an audio warning informing the intruder that they are being monitored & recorded
- In the vast majority of cases this audio warning prevents further activity
- When the police arrive our operator can quickly guide them to the location of the intruders

WHERE IS CCTV APPLICABLE?

Retail Premises > Protect valuable stock
Protect staff in vulnerable positions

Monitor high risk periods such as cash deliveries or lock up

Industrial Premises > Detect and prevent intrusions
Monitor staff for abnormalities & their own safety

Residences > Round the clock monitoring of your home and grounds.
See who is at the door before you open it

Like any detection system whether it be CCTV, burglar or fire alarms etc the alerts & activities recorded are only as good the response they generate. Simply recording actions for after the event viewing does nothing to prevent crimes or accidents & the losses that ensue.

CCTV coupled with 24hr monitoring is a potent weapon against a variety of internal & external threats including burglary, fire, reduced productivity, pilferage, & even fraudulent or suspect insurance claims.

Top Security monitor CCTV systems around the country from our Control Stations in Dublin & Cork. From these we record activity on customer sites & where necessary take preventative & reactionary measures.

A monitored CCTV system is an essential security and management tool for businesses. Modern CCTV technology is affordable, supplies high quality imagery and is a proven deterrent. Monitoring turns this passive technology into a proactive deterrent.
